

# 7" vinyl labels

please note this:

- all pictures should have 300 DPI in the end size
- create coloured documents in cmyk and black and white documents in greyscale. RGB-colours can't be printed
- please take note of the 2mm bleed
- text under 5 points may clog
- please create a little cross in the middle points of the labels but do not omit a circle with 7,5mm. This size only shows you how big the hole will be.
